ABSTRACT

Data on student enrollments in the 17 regional community colleges and state technical colleges in Connecticut are provided for fall 1989 and spring 1990. Introductory material highlights the following findings: (1) the combined community-technical colleges are the largest unit of undergraduate higher education in Connecticut, serving 48% of all undergraduates in the state; (2) in fall 1989, the colleges enrolled a total of 44,270 students, representing a 7% increase over fall 1988; (3) in spring 1990, headcount enrollment was 41,658, while full-time equivalent enrollment was 19,189; (4) 76% of the fall 1989 students were enrolled part time; (5) 56% of the students were over 24 years of age; (6) the average student age was 33 for part-timers and 22 for full-timers, with a slightly higher average age for community colleges than technical colleges; (7) in fall 1989, community college enrollments were 68% female and 32% male, while in technical colleges, the majority (82%) of students were males; (8) minority student enrollment increased 0.5% in community colleges and 1.5% in technical colleges between 1988 and 1989; (9) among minority students, 56% were Black and 32% were Hispanic; and (10) in fall 1989, 43% of all students were enrolled in occupational programs, with the largest enrollments in Business and Data Processing at the community colleges, and Electrical Technologies at the technical colleges. The bulk of the report consists of data tables, presenting enrollment data for each of the 17 colleges broken down by full-/part-time status, general fund or extension status, gender, ethnic group, age distribution, and program enrollments. Additional information on geographic distribution of funding, and associated degrees and certificates awarded is included. (GFW)

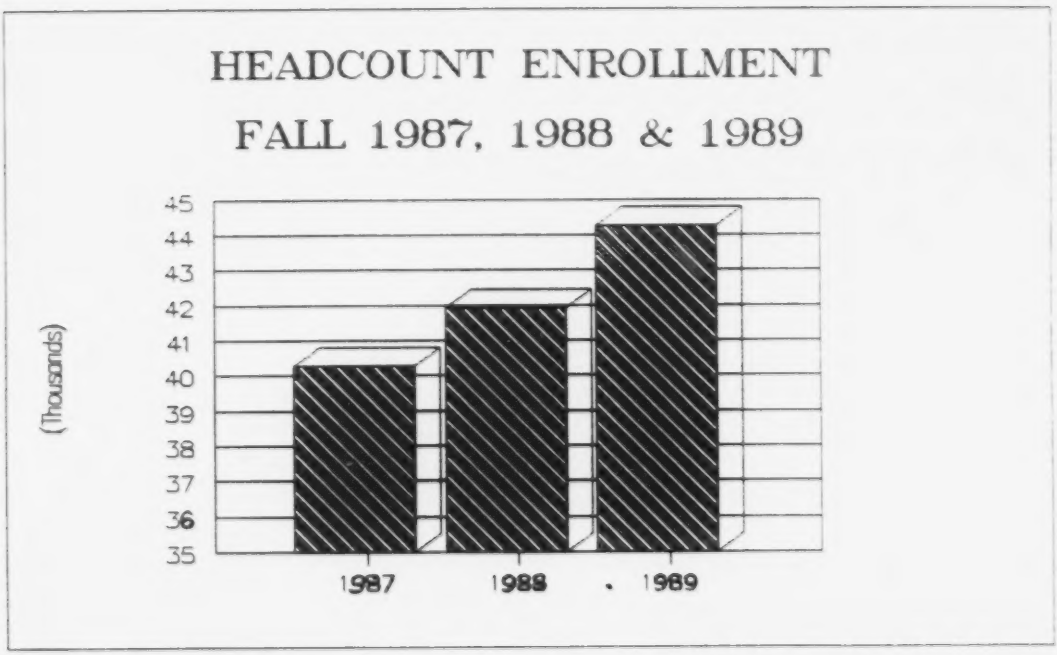
STUDENT ENROLLMENT STATISTICS
FOR
THE COMMUNITY-TECHNICAL COLLEGES OF CONNECTICUT

Academic Year 1989-90

On July 1, 1989, the Regional Community Colleges and the State Technical Colleges became one unified system of two-year higher education in the state of Connecticut. It has been a year of growth and development throughout the system, as demonstrated by the enrollment figures in this publication.

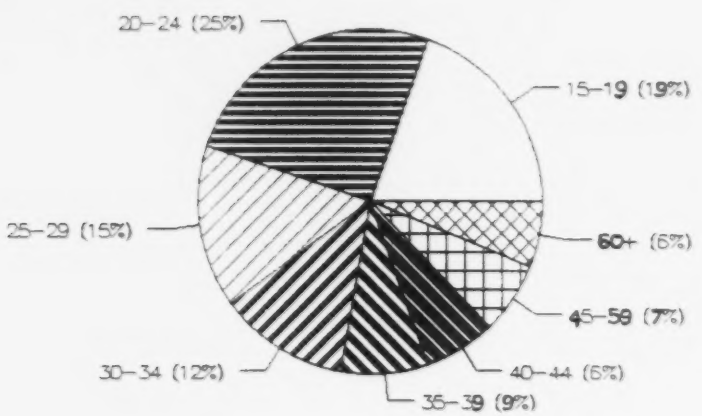
The combined Community-Technical Colleges (CTC) are the largest unit of undergraduate higher education in the state, serving 48% of all undergraduates in public institutions in Connecticut. The Fall 1989 enrollment was 44,270 students, and 20,722 FTE. This represents a 7% increase over the total Community and Technical College enrollments for Fall 1988. In the Spring of 1990, enrollment was 41,658 with an FTE of 19,189. This is an increase of over 10% as compared to Spring 1989.



The demographics of the CTC student population are similar throughout the 17 colleges. In both the Community Colleges and the Technical Colleges, the majority of students attend part-time. In the combined system, 76% of all students attended part-time in Fall 1989.

In the Fall 1989 semester, 56% of the students attending were age 25 or older. The average age of the full-time students was 22, while the average age of the part-timers was 33. The average age of the Community College full-time students was slightly higher than that of their Technical College counterparts. This is primarily due to the number of senior citizens taking classes at the Community Colleges.

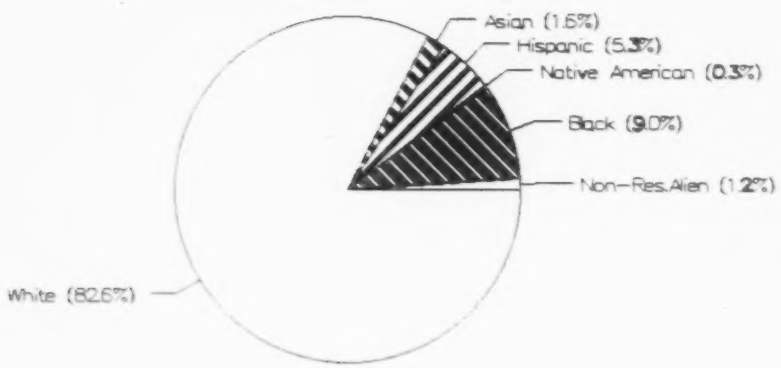
## AGE DISTRIBUTION
FALL 1989



One area in which the two units do differ significantly is in gender distribution. Sixty-eight percent of the Community College students in Fall 1989 were women and 32% were men. In contrast, only 18% of Technical College students were women, while the majority, 82%, were men. The combined system's gender composition was 62.5% women and 37.5% men.

The ethnic representation of the CTC system includes 16% minority students and 1% foreign students. Fifty-six percent of the minority students are Black, 32% are Hispanic, and the remaining 12% represent a variety of backgrounds including American Indian and Asian. These figures are, again, similar within the two constituent units. For both units, this represents a slight increase (.5% Community Colleges, 1.5% Technical Colleges) in minority enrollments over last year.

ETHNIC DISTRIBUTION
FALL 1989



Forty-three percent of all CTC students were enrolled in occupational programs in Fall 1989. The occupational program area with the largest enrollment at the Community Colleges was Business and Data Processing; at the Technical Colleges, it was Electrical Technologies. Liberal Arts and Sciences and General Studies programs accounted for an additional 34% of all CTC students, and the remaining 23% of the students were not enrolled in a specific degree or certificate program.

Below is a list of the Community-Technical Colleges along with their abbreviations used in the following tables.

## ASSOCIATE DEGREES AND CERTIFICATES AWARDED

Associate Degrees awarded by the Community-Technical Colleges between July 1, 1989 and June 30, 1990 total 3,506; an increase of 1.6% as compared to the 1988-89 academic year. Women earned 59% of the degrees awarded, and men earned 41%. These figures are proportional to the enrollments of men and women in the system. Minority students earned just over 12% of the degrees awarded this year.

Occupational programs accounted for 72.1% of all degrees awarded; the remaining 27.9% were in Liberal Arts and Sciences and General Studies programs. Business and Data Processing programs continue to provide the largest group of graduates (32%). Engineering and Technology programs combined account for 17% of the graduates.

In addition to students receiving degrees, 328 CTC students completed certificate programs in 1989-90. This is a decrease of 11.5% as compared to 1988-89. Women received 64% of these certificates, and men received 36%. Minority students received 18% of all certificates awarded. As with degrees awarded, Business and Data Processing programs predominated in certificates awarded (43%).
